InspiraCell®

Product Summary

*Inspire* is a life-giving action. So it is with InspiraCell. The combined action and cumulative effect of this formula’s nutritional ingredients are to “inspire a cell.” Cell by cell…gland by gland…organ by organ…and system by system—the body is restored, renewed, and recreated. InspiraCell is a “Heart-Brain-Immune-Structure” nutritional support supplement.

Keeping You Healthy With InspiraCell

- **A Healthy Heart**
  A prominent doctor refers to the heart as the “queen bee”. All other organs, systems, glands, and structures will work, and even sacrifice if necessary, to support the heart. If the heart is healthy, the rest of the body’s systems can function with ease—free from the exhausting, yet necessary service to the heart. InspiraCell provides support through vitamins, minerals, amino acids, and enzymes.

- **A Healthy Nervous System**
  The heart and brain work together, so a healthy nervous system is also an important factor—especially in the area of memory, cognition, and the ability to learn. A healthy brain releases neurotransmitters that carry instructional messages across the gaps between each of the approximate 100 billion nerve cells in the brain. Chronic stress depletes neurotransmitters, which may cause unclear thinking, difficulty learning, exhaustion, depression, poor memory, etc. InspiraCell contains essential amino acids, of which neurotransmitters are made.

- **A Healthy Immune System**
  The immune system is also supported through the amino acids contained in InspiraCell. Amino acids are the building blocks of protein. They assist in restoring and recreating what has been broken down and destroyed.

- **Healthy Fluids in Eyes, Joints, and Skin**
  Hyaluronic acid found in InspiraCell nutritionally supports and maintains healthy fluids. A powerful synergy occurs as major systems are supported and maintained enabling them to work together with balance and ease.
Experience The Difference: VerVita’s formulas are designed to nutritionally support the body as a whole; balancing the vital energy that flows through every organ, gland, cell, and structure with materials that work synergistically to stimulate and relax, push and pull...creating a healthy rhythm and function.

Key Ingredients

Amino Acids: Amino acids are the building blocks of protein, and life without protein is not possible. They carry oxygen throughout the body and are necessary for growth, cellular replication, and communication between nerve cells by means of neurotransmitters, which are imperative for optimal memory, learning, and brain function. GABA is not an amino acid, but is a neurotransmitter.

Antioxidants: Antioxidants such as Gamma Oryzanol (from rice), Alpha Lipoic acid and Beet root remove free radicals that cause damage to cells. Alpha Lipoic acid is also involved in dissolving toxic substances in the liver. Beet root also contains easy-to-assimilate iron and is good for digestion as it has properties that clean the kidneys and gallbladder.

Enzymes: CoQ 10 is a co-enzyme that functions in every cell to synthesize/generate energy. The heart, liver and kidneys have the highest energy requirements so there is an increased concentration of CoQ10 stored in these organs. Smoking, alcohol, stress, aging, chronic illness, beta-blockers and cholesterol-lowering drugs deplete CoQ10 stores in the body.

Herbs: Hawthorne berries have been called the “top herb for the heart” and is considered by many herbalists to be the “safest of all herbal supplements”. Acerola berry is rich in Vitamin C and is easily absorbed. It also contains vitamin A, B vitamins, carotenoids and bioflavonoids.

Hyaluronic acid is naturally found in the fluid of the eyes, joints and spaces of skin tissue. Studies focus on the role it plays within the arteries of the circulatory system, in the immune system, and in the formation of new body tissue such as cartilage.

Vitamins: B vitamins have been shown to be beneficial in maintaining a healthy heart, which in turn promotes healthy circulation, blood pressure, and ultimately the entire body working as a whole. InspiraCell also contains vitamins that support the nervous system, immune system, and skin with Folic Acid, Biotin, Pantothenic acid, Vitamin C, Vitamin D3, Vitamin E as d-Apha tocopherol acetate with d-Gamma, d-Delta and d-Beta.

Primary Benefits of Key Ingredients:

- Immune System Support / Auto-Immune Disorders
- Heart Support, Protection, and Rehabilitation
- Brain Support for Growth, Development, Memory and Cognition
- Nourish Fluids in Joints, Eyes, and Skin
